#### *Key Words:*

Technology,  
Leadership.

### ABSTRACT

The article demonstrates the importance of a leading teacher knowing about technology in education and encouraging other teachers to use it. Teacher leaders need to be more involved in learning about and using modern technology than other teachers. Educator leaders should help educators find opportunities for professional development around technology.

## INTRODUCTION

In today's world it is necessary to incorporate technology in the classroom. Teacher leaders need to know how to use various types of technology to be able to encourage other teachers to use it, too. Leaders need to be able to model technology use, help teachers find professional development opportunities about technology, implement technology based programs in the classroom, and communicate using technology (Schachter, 2010).

## CONCLUSION

The importance of encouraging the teacher-leading of teachers to have a strong understanding of technology and its use, and that this leads to creating a more effective learning environment.
